If there are triplets, the most persistent stands to gain an extra meal at the expense of others. The smallest of the cubs forfeits many meals to stronger siblings. Females are protective of their cubs but tend to ignore family rivalry over food. In 21 years of photographing polar bears, I have only once seen the smallest of triplets survive till autumn.

As home entertainment, television is rapidly becoming more (<u>4</u>) than any other form. A news broadcast becomes more immediate when people (<u>5</u>) actually see the scene (<u>6</u>) question and the movement of the figures. Films could be viewed in the (<u>7</u>) of the home and a variety of shows are also available. One of the advantages of travel programmes is the (<u>8</u>) of faraway places which many viewers would not (<u>9</u>) see.
