SAMPLE STORIES

1.

Samunder used to make ceramic surahi and sell them. He obsered a great decline in his earning since very few were interest in buying ceramic surahi even in the rural areas he was not selling many. It was because of the growing no. of water purifiers in every household. The surahi had been losing its position from the households. One day while he was taking rest he felt something in his pocket is bothering him. He checked and found it was stone, but that stone was glistening. He put stress on his mind and found it came from the river he visited in morning. There he got the idea of making surahi which also shines like this stone. He ground that stone and mixed with clay and made a surahi. later he brought other stones of different colors and then many different patterns were started coming on surahi. now everybody wanted to buy surahi for their houses. one day while he was on his way to other city to sell surahies, a man in suit came to him and inquired about those

surahies. He liked those surahies and offered samunder to sell them online. after six months many e-commerce website were selling samunder's surahies. Now he do not wander place to place to sell surahis.

2.

Ramesh has just come out from the prison after serving his sentence over theft attempt. He tried to snatch a lady's purse and run away but a woman hold his leg and fought with him till crowd captured him and hand him over to police. Now he seeks revenge from the lady. He bought a knife and went to her house in night. He observed that woman's husband is no longer alive and has only one child. He introspect himself and asked himself what he has been doing in life. He felt very bad about himself. He then woke that lady up and told her about everything and asked lady to hand him over to police, but she apologised him. the next day he again come to meet that lady and told him that now he want to work in order to improve the life of other people who come out of jail. He told her about his plan of starting a NGO who will support the man after sentence serving. They together started a NGO which looks after the family of man who are behind bars and help them to provide jobs after their sentence completes.

3.

John works as a software engineering in encript pvt. Ltd. Company. One day he got a call from the director of music company. They decided to meet at a coffee shop. The director told him that they are going to launch an album after six months which is being produced by some of the top musical artists in our country and this album is going to be huge hit. But there is a inevitable problem of piracy they face because of which we loses a big amount of money in market. John asked a time period of three months. He made a team of engineers of web technology, data encryption and data transfer over internet. After extensive research they build a tool over web that can self destroy data after first use. They made a presentation and presented in front of music company. They informed them music will be distributed over web rather on disks, registered user can listen song once for free, after that they have to pay 1 rs. To listen. They can download as many time as they want for 1rs. Each time, and each song can be listened only once after that it would erase itself. Company liked the idea of John's team and they finalised deal with them. John and team developed a sophisticated website for music to launch and launched music successfully. Later this became the most favourite way of launching music for music companies.

4.

Ankur is studying in his final year of mechanical engineering. One day while he was going to his college his bike tire got punctured. He went to nearby bike mechanic and asked him to make tire good. Mechanic opened tire and saw the tube has been torn. He recommended Ankur to replace tube with new tube, but Ankur had not brought that much money and also he was getting late. The mechanic somehow repaired the tube and the bike was again ready to run. While Ankur was riding back to his college, he thought about the mechanic that he has been working as a mechanic for a long time, not moving to a higher rank, if he had been in a company he might have been promoted to an upper level till now. Also his skill level has reached to a much higher level as he has been working for so long, and still not getting as much salary as deserved. Ankur shared this thought with his friends. They decided to help that mechanic and many such other people who are uneducated but skilled. They persuaded that mechanic to join a degree course of six months which he completed in just three months. After they helped him to bring a loan from the bank and started his own shop. Later his shop became the most popular in the area.

5.

Mukesh is a medical student who lives in a colony where a garbage problem is creating a lot of health issues. Many parents are often visiting doctors about the health of their children. Most of these problems are associated with uncleanliness of place. He decided to launch a drive to clean their colony. He went to schools where children of this colony are studying and took their classes about health issues and made them understand how cleanliness leads to health. He then asked children to bring their parents to the playground on a specific day where they would all formulate a procedure to effectively remove garbage from the places. He then went to all the rag pickers who roam around the colony. There in the meeting he suggested that outside every house there would be two dustbins, each for wet and dry waste which would be picked by these rag pickers daily. All the residents agreed and formulated an amount of money which each house will pay to those rag pickers at the end of the month. Just after one month the whole scenery of the colony changed and there was a huge drop in the no. of people who were getting sick.

6.

Salim was with his neighbour's son in the hospital when his neighbour was declared dead by doctors. He was suffering from blood cancer, His blood type is very rare among population and they could not find donor at the time. He consulted doctors about availability of donors, doctors told him that donors are available but we are only restricted to our storage capacity, there is no way to find more donors though there are many people who will help if asked on time. Then he decided to create a website that will show the blood groups of people of that area along with their contact numbers. He started his plan from school of that neighbour's son. He knew school conducted blood group test of admitted students. He appealed school authority to share that data with his website. He grew database school by school and from children to their parents. Later that website was linked with the website of government hospitals. This information helped a lot in cases of blood cancer and accidents. Later government decided to endorse and fund salim's website and take this project to other cities of India as well.

7.

Anup lives with his wife and children. Just along with their house, there was a house of Mr. and Mrs. Mehta. They often fight and shouting could be heard in the whole neighbourhood. Mrs. Mehta's husband used to drink a lot. One day there was a big fight between the couple; Anup heard the noises of breaking things. Mrs. Mehta came out of their house weeping. Anup and his wife also came out of their house and tried to calm Mrs. Mehta. Her husband was too drunk he went to hit his wife but Anup restrained him from doing it. Anup threatened Mr. Mehta to complain about him of domestic violence. Mr. Mehta left that place. Anup told Mrs. Mehta that domestic violence occurs because wives endure it. He suggested Mrs. Mehta to take up a job, she would not only gain confidence in her but also her and her children's future would also become secure. Mr. Mehta has been always an incorrigible drunkard. Anup gathered other elder and sane persons of the society and went to Mehta's house. Anup's idea was to give him a warning of social rejection if he continues to behave like that. They firmly told him how his behaviour is destroying their children's future. Anup with some other members started spending time with Mr. Mehta so that they can help him leave drinking. As time passed Mr. Mehta has improved himself a lot and now living happily with his family.

8.

Krishan was a farmer of a village. Many farmers of this village used to grow vegetables and fruits. Many farmers were having a huge loss as stray animals used to come to fields in night and ate their fruits and vegetables and also there were many thefts of fruits and vegetables were going on in the night. Krishan called panchayat to address this issue. Krishan proposed that those who do the farming of fruits and vegetables out of them 4 or 5 members will be selected to watch the fields every day turn by turn. One day it was Krishan's turn to go to fields. That day weather was very upset. He asked other farmers to come with him and everybody refused and thought today no animals or thieves can come because to storm. But Krishan decided to go to fields alone. When he went to field he saw that the river bank has broken and water was being flooded into the fields. He immediately started repairing it but was not able to do it alone. He then cut some trees and along with the bank and pour leaves and mud between them to

make a temporary stoppage. He then rushed back to village and called others farmers. All of them together were able to repair the flooding of water into fields.

9.

Manish hails from a small village. His village used to receive much water from rain in rainy season but they often felt the shortage of water as there were no lakes to provide water when needed. His village was surrounded by hills. He suggested his father that they can build a concrete pond high above the ground which will collect water coming from hills in rainy season and that water could be used to facilitate fields when needed. His father called the panchayat and brought this issue. The surpanch of the village agreed to use funds to build that pond. All the villagers helped to build the pond. A committee comprises of elders was formed to distribute water so that no conflict occurs over water distribution. Now villagers and use that water whenever needed. Later farmers of the other villagers took inspiration from their work and build ponds in their villages too.
